### DETAILED ACTION

The preliminary amendment filed 11/24/99 has been entered. A status inquiry was received from Applicants on 3/20/01.

#### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22-42, 44-64, 66-73, 75-82 are drawn to antibody to SEQ ID NO:2 or polypeptide encoded by human cDNA of ATCC #97853 or fragment thereof or antibody fragment, composition comprising the antibody or antibody fragment, and method of producing the antibody or antibody fragment, classified in class 530, subclass 388.22.
- II. Claims 43, 65, 74 and 83, drawn to method of detecting a polypeptide by with an antibody, classified in class 435, subclass 7.1 The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced with another materially different product such as with the ligand of the receptor of SEQ ID NO:2, and the product can be used in a materially different process such as in the affinity column purification of the DR4 protein.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, have recognized divergent subject matter, and because each invention requires a separate non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1646

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

It is noted that at such time as the elected product claim(s) are indicated as being allowable, rejoinder of claims drawn to methods of using such may be requested pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86). Such rejoinder is *not* tantamount to a withdrawal of the restriction requirement.

#### ***Priority***

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification (37 CFR 1.78). While the filing receipt was corrected to indicate that the instant application is a divisional of 09/013,895, the first sentence incorrectly recites that application as 09/013,985. Correction is required.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Claire M. Kaufman, whose telephone number is (703) 305-5791. Dr. Kaufman can generally be reached Monday through Thursday from 8:30AM to 12:30PM.
